

# AI and its consequence on the job market

By Ian zhu, Han chong Guan, Mark Limbo, Hsiang Yi chang

# Booming of AI

Ever since the booming of AI research, we have been given a lot of useful tools that will help us in our daily life. With example like ChatGPT, Gemini, and Claude. They are all very useful LLMs that boost our productivity.

ChatGPT

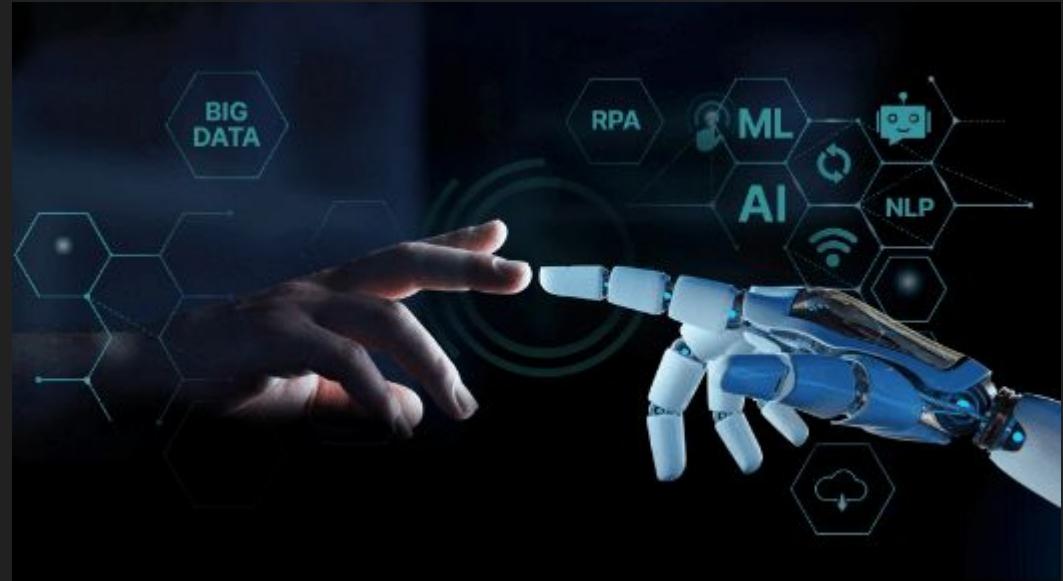

Gemini

Claude

The Claude logo features a stylized orange asterisk-like icon followed by the word "Claude" in a black serif font.

# Efficiency

Even so more! New agentic AIs are automating many different job task with plenty of efficiency as well!

# Impact

However, have we thought of the impact that it will have on the job market?

# Forecasts

The recent forecasts predicts that many jobs are going to be replaced by some form of AI models. Though it is just a forecast, we already see it happening.

# Replaced

The recent layoffs in many companies blame AI as a factor for these sudden job removals, where automations is taking over many entry level jobs...
